

# TEMPLATE

## For cutting fabric for the coaster TOPS and BOTTOMS

To save on your fabrics for the drink coasters, use this template to “rough cut” the decorative fabrics for the TOPS of your coasters AND for the coaster bottoms. Consider using a **HEAVY** fabric for the coaster bottoms--possibly 1-2 layers of canvas. This circle does **NOT** need to be cut exactly. Just cut roughly and place on the top and bottom or your stabilizer that has been sprayed on both sides.

Do **not** cut  
batting larger than this.

# BATTING TEMPLATE

You may use this template to cut batting for the TRAPUNTO coasters. OR you may cut pieces of batting slightly larger than the letters.
